## Advanced Placement Physics C: Course Outline

Dr. Timothy Leung

---

### Class Time

The Advanced Placement Physics C course at Olympiads School runs for a total of approximately 50 hours. For the Summer 2021 session, the class times are on **Saturdays and Sundays 7:00pm to 9:30pm**.

### Outline

The course is divided into two parts, and covers all the topics in the two calculus-based exams:

- Mechanics
  1. Kinematics
  2. Dynamics
  3. Work and energy
  4. Momentum, impulse and collisions
  5. Center of mass
  6. General circular motion
  7. Rotational motion
  8. Harmonic motion (oscillations)
  9. Universal gravitation and planetary motion
  10. **Practice AP Physics C: Mechanics exam**
- Electricity and Magnetism ("E&M")
  11. Electrostatics
  12. Capacitance
  13. Magnetism
  14. Inductance
  15. Circuit analysis (RC, RL, LC and RLC circuits)
  16. Maxwell's equations and electromagnetic wave
  17. Hall Effect
  18. **Practice AP Physics C: E&M exam**

### Prerequisites

Before taking the course, you should be comfortable and competent in the material covered in:

- **Grades 11 & 12 Physics:** Student should be comfortable in all the topics covered in the high-school level physics courses. Most topics from both Grades 11 and 12 Physics are covered more in-depth in this course.

- **Calculus:** Both C exams are calculus based, and students will be required to perform basic differentiation and integration, as well as solving basic differential equations.
- **Vectors:** Students need to have basic understanding of vector operations, including addition and subtraction, as well as dot products and cross products.

### Course Material

- Textbook is not required. However, lecture slides, handouts and any additional resources are posted on the school website each week (please check and download)
- Homework questions are generally based on university-level textbook problems, and past AP C exams. There is a homework problem set for each topic, and they are posted on the school website as well as on the online platform Classkick

### Classroom Expectations

Students attending this course will be expected to:

- Be ready to learn and participate during class
- Stay on task without disturbing or distracting others
- For online classes: Post your questions in the Zoom chat window
- For in-person classes: Raise your hand if you have any questions or comments and wait to be called.
- Don't wait too long before you ask a question
- If you need to leave the class early, please inform your teacher and the school
- Be respectful for yourself and others. You may not be an adult yet, but you should know how to act like one
- Students who are removed due to bad behaviour will not be allowed back to the class.

### Homework Expectation

Homework is assigned after every topic is finished (approximately every week during the fall/winter session, and twice a week during the summer), depending on the length and difficulty of the material for that topic

- Homework questions, like the AP exams themselves, will include both multiple-choice questions and free-response questions
- Late homework is always accepted. However, the longer you wait, the less meaningful they will be in your learning
- For free-response questions:
  - Show *all* work by providing complete and organized steps. In AP exams, only part marks are awarded for the correct answer; most of the marks are for applying the correct concepts and diligent work. (Hint: Answer all questions as if the reader is learning the concept from you, not as if they already understands it.)
  - If a question requires you to *explain*, please do so using short short complete sentences with sufficient supporting detail.

- Proper math format should be used, e.g. proper use of “=” sign, units, etc.
- Circle or box all your final answers.
- Due to time constraints, the homework questions will be taken up in separate videos outside of class time. The links to the videos will be posted on the school website.

### Additional Notes

To help students with getting comfortable with the format of the AP exams, all effort have been made to ensure that

- Whenever possible, the course material uses American spelling (e.g. meter instead of *metre*, color instead of *colour*)
- The homework questions are formatted to look like the actual in-person AP exams
